What is FileSender?

What is FileSender?

FileSender is a way to share large files with anyone. It works through your web browser to send a file to any email address.

FileSender can send files up to 500 GB. This considerable sending power allows users to transfer large files with ease.

Files sent by FileSender are available for download for up to 30 days after sending. Files can be downloaded an unlimited amount of times over this period.

Why Use FileSender?

Why Use FileSender

Just Email it!

Email was not designed as a file transfer protocol

Most Email servers impose hard limits (e.g. 20MB)

So use FTP

You need to maintain a server

You need to authorise users

You need to open up the firewall

Dropbox/etc

Should your data be in the cloud?

Desktop – no limits / Website 20GB Limit

2GB Quota (+€)

“I call the big one Bitey”
