

HEAnet Research Engagement Activities

2021 Shoutout

HEAnet Research Engagement in 2021 focused primarily on raising awareness of services & opportunities for collaboration & funding available to researchers.

Another key area of support was the advancement of Open Science in Ireland, drawing on our work in the EOSC Association and EOSC Steering Board. We conducted webinars with researchers from a variety of disciplines and Science for Ireland (SFI) centres. The discussions, along with 1:1 follow-ups, enabled HEAnet to provide targeted support to researchers.
