A top-down view of a desk with a laptop, calculator, coffee cup, and newspaper. The desk is white, and the items are arranged in a casual manner. The laptop is open, showing a keyboard. The calculator is a standard office calculator. The coffee cup is a simple brown mug. The newspaper is a business section, with the word 'BUSINESS' prominently displayed. The background is a light blue and white geometric pattern.

New GÉANT IaaS+ Framework

€7.34m annual savings for sector!

Expedited order of 16,700 laptops

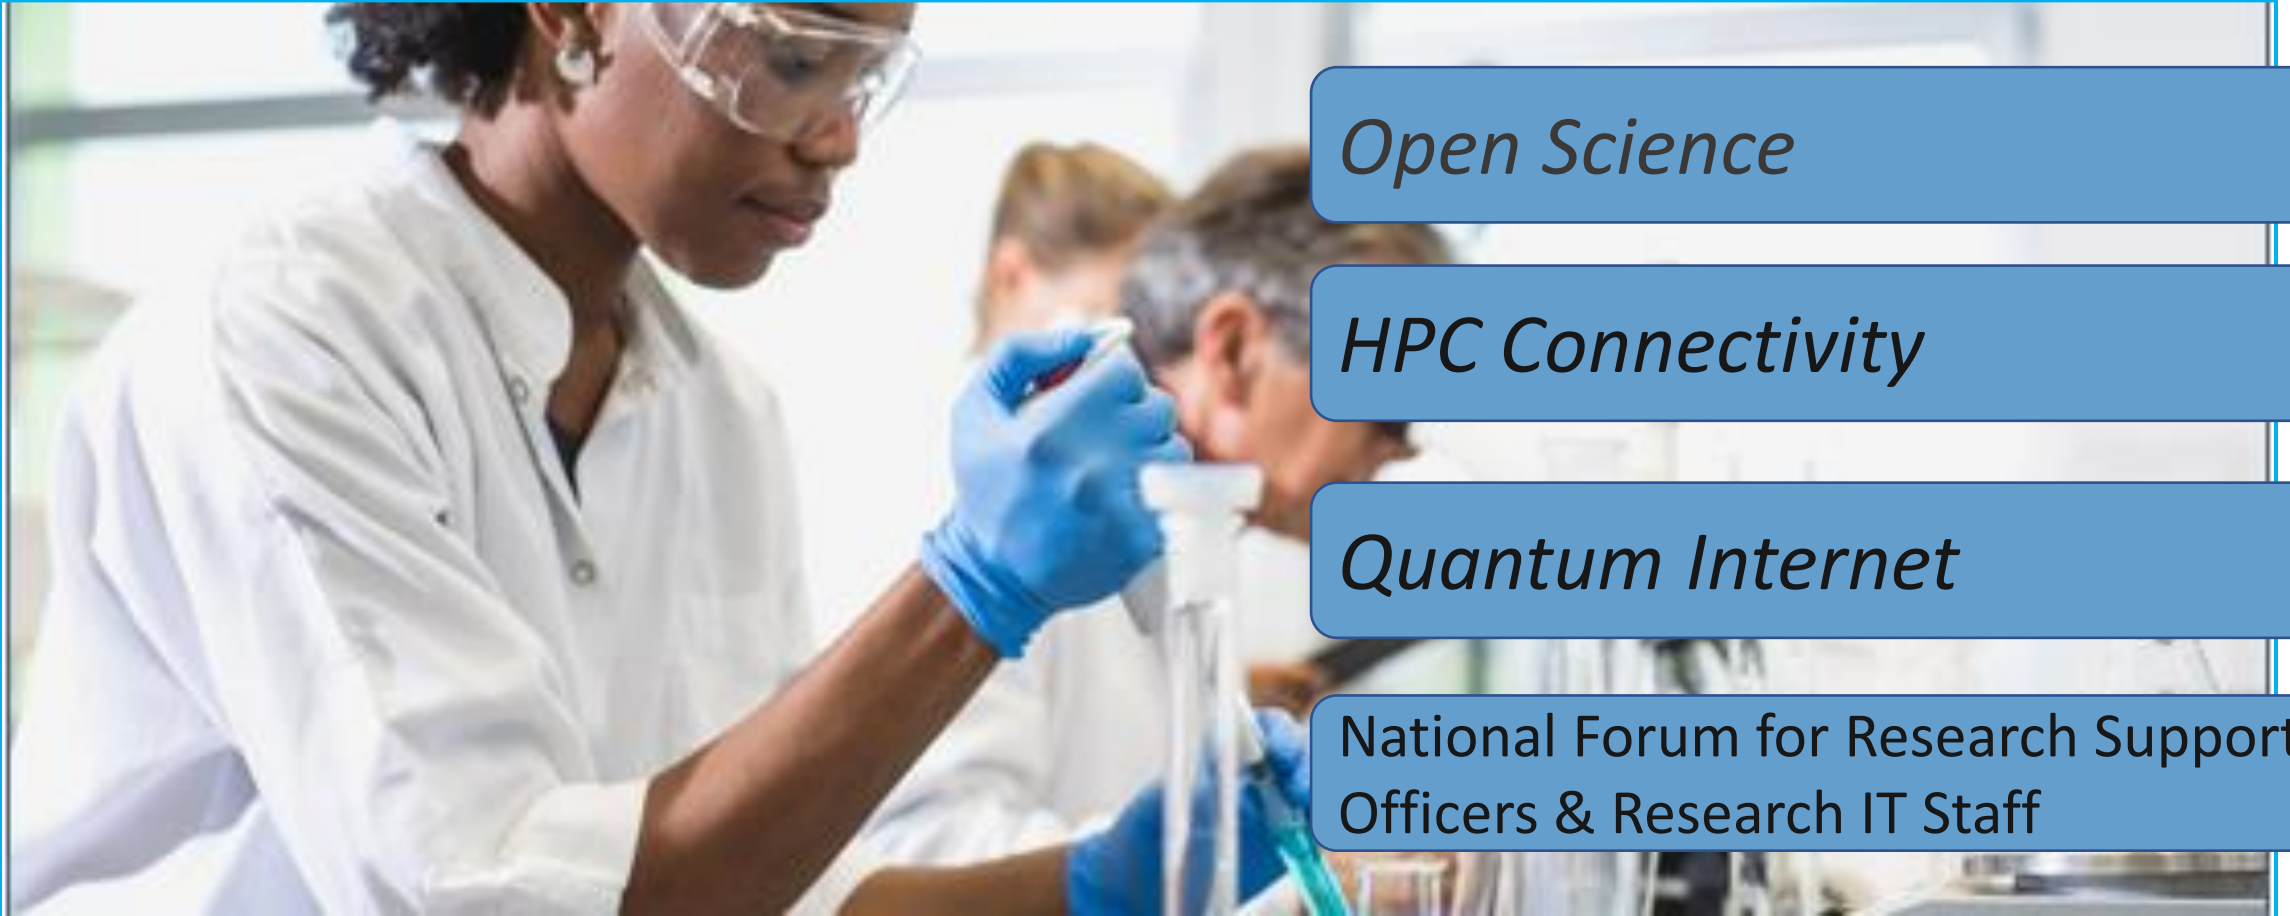

“Extremely beneficial. I honestly don't know how I would have been able to maintain college without it. I feel that it has taken a severe amount of pressure off of me.”

“It has had a huge impact on my learning. I was trying to work from a phone and it just wasn't working well for me. The laptop made all my modules and on line calls so much easier. I was very stressed out not having one.”

“Have been able to not worry about my parents trying to buy me one. Have been able to complete project and class assignments faster than I would have on my phone.”

“I had to withdraw from my classes as my wife was ill. I tried to connect online with my phone or my son's computer, but he needed that for work and the phone was not really great. Getting this laptop from the school's Further Education department has been a great thing for me. I can continue with my course, take up studies again and because the school has helped me to get used to zoom, I can see all my friends in the class and the best of all, can re-join my social club. I am feeling so much better in myself, coping with my wife's condition, easing my own isolation, and having a laugh once again”.
